

Clean Room Panels & Doors

These freestanding, double-wall pharmaceutical / cleanroom / OT panel structures meet critical requirements for flexible configurations, rapid delivery, and clean operation. Engineered for ease of installation and cleaning, Cleanroom panels come in standard 4-foot (1219 mm) widths and heights ranging from 7 to 10 feet (2134 mm to 3048 mm). Their modular design lets you configure a custom cleanroom using pre-engineered components. We also offer Vision panels & **Polyurethane Paint (PU)** on walls. The best part of PU paint is they are wall protective coatings, eco- friendly, are resistant to water and cleaning chemicals, are easy to apply and are dust proof in nature. They are also scratch resistant and can be availed in various shades.

Wall Panels are available in various thickness 30mm, 50mm & 80mm
